Altura Staff Augmentation for Healthcare

Improving patient care is the number one priority for every healthcare provider. Altura's industry-leading staffing solution provides IT and voice personnel directly to healthcare clients who lack the time to recruit, train, and manage these resources.

Altura assesses your current and future IT staffing needs, then implements a strategy to match our technical resources, skills, and competencies to your business. Our healthcare customers appreciate the benefits of having access to dedicated Altura technicians and voice and data professional services, on-site, either full or part-time.

As an extension of your staff, Altura adheres to internal processes and policies, while offering streamlined solutions to IT projects that can save you both time and money. Our staff implements and supports your voice and data needs and manages issues that arise during the workday, avoiding escalation.

Immediate Benefits Include:

Cost-effective management of IT staffing needs

Timely access to highly-trained and certified representatives

Personnel with needed capabilities and skillsets

Optional after-hours and weekend support by Altura's Network Operations Center
